WORK EXPERIENCE

Pipe Masters Inc.

Franklin, USA

Master Plumber

June 2018 - Present

This company does pipes.

- Lead a team of 4 journeyman plumbers on large-scale commercial projects, including new constructions and major renovations.
- Read and interpret complex blueprints and schematics to plan plumbing system layouts and installations.
- Specialize in diagnosing and resolving difficult issues in water supply systems, including pressure irregularities and water hammer problems.
- Train and mentor apprentices on proper techniques, safety protocols, and adherence to the Uniform Plumbing Code (UPC).
- Manage project inventory, order supplies, and ensure all materials meet project specifications and quality standards.
- Perform final inspections and pressure tests on all new installations to guarantee a leak-free and fully operational system.

Reliable Rooter Services

Clinton, USA

Journeyman Plumber

August 2014 - June 2018

Awesome plumbing for cheap.

- Installed, maintained, and repaired pipes and fixtures (sinks, toilets, water heaters, showers) in over 500 residential homes.
- Responded to emergency service calls for leaks, burst pipes, and severe clogs, effectively minimizing water damage for clients.
- Utilized power snakes, hydro-jetters, and camera inspection tools to efficiently clear and diagnose drain and sewer line blockages.
- Provided clear, detailed estimates to customers for repair and installation jobs.
- Adhered strictly to local building codes and safety regulations on every job site.

VOLUNTEERING

Community Build Project

Washington, USA

Volunteer Plumber

Summer 2022

Helping others with purpose.

- Contributed 40+ hours to install complete plumbing systems in two new homes for a local low-income housing initiative.
- Collaborated with electricians and carpenters to coordinate the rough-in and finishing stages of the plumbing installation.
- Taught basic plumbing maintenance skills to the new homeowners, empowering them with foundational knowledge.
